

## Transpyrenaica - Enduro from coast to coast

One of the best rides of your lifetime

The OFF-ROAD Hit of the year - 1500km by road book through the Pyrenees. Whoever took part in this event, and there have been many in the last years, will tell you that they intend to come back again! They can confirm:

Enduro riding through the Pyrenees is such a great experience because its landscapes and the riding terrain are extremely diversified. We travel from the shores of the Mediterranean to the shining waves of the Atlantic over many highs of the Pyrenees Range, from the exciting tourist centers to the smallest deserted villages in the mountains.

The total route of over 1500km is marked by road book, and as a result you can find your own way. In appropriate small groups all riders can ride at their own pace, without having to follow a tour guide. For cracks, everyday days there is challenging sideways waiting to test you!

The Transpyrenaica is not a tour for absolute off road beginners. Depending on the weather we may have to "fight" our way through. For example, the month of May could throw us through a long snowy field, deep stream crossings, and the need to overcome slippery, craggy, steep ascents. However the fun of Del Bondio Enduro trips also includes first class food, Spanish red wine, and good, well maintained accommodations. Your daily enduro efforts are rewarded with these nightly treats.
